BLACK POND VETERINARY SERVICE AND WHIT ACRES FARM BREEDING STATION INFORMATION SHEET

Black Pond Vet Service and Whit Acres Farm have teamed up to provide routine breeding services for our clients. Such services include, but are not limited to, the following:

- Artificial insemination of fresh/cooled semen
- Artificial insemination of frozen semen
- Collection, processing, evaluation and packaging/shipping of fresh, cooled stallion semen

Fees and Guidelines:

Black Pond's veterinary fee for artificial insemination of fresh/cooled semen is \$325 for one estrus cycle. The fee for artificial insemination of frozen semen is \$500 for one estrus cycle.

- ❖ This fee includes the following:
 - Rectal examinations
 - Ultrasounds
 - Sedation
 - Receiving of semen shipment, processing of paperwork
 - Evaluation of semen prior to insemination
 - Artificial Inseminations
 - First pregnancy check via ultrasound at 14-16 days
- ❖ This fee does NOT include the following:
 - Medications (i.e. oxytocin, hCG, lutalyse, etc.)
 - Additional procedures (i.e. uterine culture/cytology, uterine lavage, etc).
 - Daily mare care/board to be paid to Whit Acres Farm (\$30 per day).
- ❖ Please note the following:
 - Mares must be boarded at Whit Acres Farm for our breeding station fee to apply. Note that you will not incur barn call charges while your mare is with us.
 - We recommend mares stay at Whit Acres Farm through the first pregnancy check at 14-16 days. It is recommended that mares stay with us for at least 25 days prior to leaving Whit Acres. This is to ensure that pregnancy is confirmed and well-established prior to shipping. If you choose to take your mare home, we cannot guarantee that a stall is available should your mare need to return but will make every effort to accommodate you.
 - If your mare is not pregnant after the first insemination attempt, veterinary care during each subsequent cycle will be discounted \$100. Mare care/boarding fees still apply.
